

Passport Data Extraction

The SnapShell P5 is a full-color, high resolution scanner based on the DESKO Icon. The SnapShell P5 quickly and accurately extracts data from government issued identity documents from all over the world including driver's licenses from all 50 US states, military IDs and alien registration cards.

- High-quality Image 400 dpi
- MRZ reading for all ICAO-9303-compliant ID1, ID2, and ID3 documents
- VIZ or OCR reading of non-ICAO-compliant ID
- Scans of ID documents under visible and infrared light
- Scans without cover possible for all light sources
- Optimized for collecting OCR data
- Picture from passport or ID card can be captured as a separate image
- Scan technology with antireflection effect prevents light spots and reflections that can be caused by lamination or holographic printing
- Automatic activation: the scanning process is automatically triggered based on document recognition

Scan Area	L 94 mm (3.7 inches) × W 130 mm (5.12 inches)
Resolution	400 dots per inch (dpi)
Color	VIS = 6000K, IR = 850nm
Scan Speed	23mm sec @ 600dpi/ 76mm sec @ 300dpi
Interface Type	USB 2.0
Dimensions	L 79 mm (3.09 inches) × W 149 mm (5.83 inches) × H 147 mm (5.76 inches)
Weight	650g (1.45lb)
Power Input	USB Powered
Certifications	CE, FCC, CB report, WEEE, RoHS
Environment Operating Storage	0-40°C; 20-95% RH, non-condensing -10-60°C; 20-95% RH, non-condensing
Interference	Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
